

. SoCalGas Climate Adaptation

Regulation Review and Participation Opportunities

- **SoCalGas understands that to build a more resilient, climate adaptable region we need to work collaboratively and listen to feedback from communities.** As a leader in your area, we are hoping that you will help us move the needle forward on climate action. As a valued community partner, we would like to invite you to complete the following survey which will support SoCalGas as we look to identify opportunities and partnerships for our Climate Adaptation and Sustainability efforts and initiatives.

The goal of this survey is to understand better the climate-related topics most important to your organization and explore potential long-term partnership opportunities related to our Climate Adaptation and Sustainability efforts. SoCalGas is committed to finding ways to intentionally support work or partnerships that will make a meaningful impact in your community. Your input is very important to us, and we appreciate you taking the time to provide us with your honest feedback.

• Organization Information

Page 1 of 3

- Organization Name *

Desert1

- What kind of organization do you represent?
 - Local or regional government
 - State government
 - Federal government
 - Nonprofit or community-based organization
 - Philanthropy (foundation or grant-making entity)
 - Academia
 - Tribal nation
 - Other (please specify)
- Is your organization currently engaged or have a focus in climate or sustainability?
 - Yes
 - No
 - Other (please specify)
- Which of the following topics is your organization most interested in?
 - Climate change adaptation
 - Habits and ecosystems
 - Supply chain sustainability
 - Education
 - Air quality
 - Transportation and mobility

- Sea level rise and coastal flooding
 - Hydrological changes (extreme rainfall, flood, drought, runoff, etc.)
 - Employment and green job creation
 - Climate change mitigation
 - Energy affordability
 - Clean, safe, reliable energy
 - Access to outdoors (parks, beaches, etc.)
 - Wildfire
 - Extreme heat
- Are you familiar with any of SoCalGas' past or current sustainability and climate change initiatives?
 - Extremely familiar
 - Somewhat familiar
 - Not familiar

• Regulation Review

Page 2 of 3

- The California Public Utilities Commission (CPUC) recently decided on new regulations on how California investor-owned utilities should approach climate adaptation. This ruling includes guidance on how utilities like SoCalGas should develop community engagement plans and vulnerability assessments.
- Were you familiar with the CPUC's decision prior to taking this survey?

Yes No Somewhat

- *The core directive of the CPUC ruling states that:*

"This decision takes steps to ensure the energy utilities we regulate are prepared to upgrade their infrastructure, operations and services to adapt to climate change, and to ensure safe and reliable energy service to all Californians—including those most vulnerable and disadvantaged. At its essence, climate change adaptation for California's investor-owned energy utilities (IOUs or energy utilities) focuses on incorporating the best available climate science into utility infrastructure, operations and services for the long-term to help ensure provision of resilient and reliable service to all customers."

Vulnerability assessments will focus on climate risks to operations and service as well as to utility assets over which IOUs have direct control. Assessments should identify areas in need of extra funding, outreach and education, and parties may weigh in on such areas. The vulnerability assessments will provide the information the Commission and stakeholders need to determine whether infrastructure or service changes will be needed as a means of climate adaptation."

To achieve this, SoCal Gas is reaching out to community-based organizations and residents in our service areas to encourage their participation—at any level and at any time during this process.

Examples of participation may include:

- **Goal development**—Identifying and developing goals for the vulnerability assessment process and outputs

- **Scope analysis**— Determining the overall scope of the vulnerability assessment, such as which climate hazards, timeframes, and scenarios should be considered
 - **Data gathering**— Gathering data from communities to help identify critical vulnerabilities and priority adaptation needs
 - **Implementation**— Developing plans on how to integrate SoCal Gas' vulnerability assessment data into adaptation plans and support regional climate resilience initiatives
 - **Administration**— Ongoing engagement with SoCal Gas throughout the process, such as being part of a stakeholder advisory group
 - **Review**— Providing feedback on the findings and outputs from the vulnerability assessment.
-

- Based on this information, would your organization be interested in directly participating in and/or supporting the development and implementation of SoCalGas' climate change vulnerability assessment?
 Yes No Maybe
- Please select which of the phases of the vulnerability assessments you'd like to be part of? (select all that apply)
 Goal development
 Scope analysis
 Data gathering
 Implementation
 Administration
 Review

• Engagement Preferences

Page 3 of 3

- What is your preferred way of engaging with SoCalGas about the vulnerability assessments? (select all that apply)
 - Large community meeting (webinar or in-person forums)
 - One-on-one interviews
 - Small focus groups
 - Surveys
 - Other (please specify)
- How would you like to receive updates and reports on SoCalGas' climate adaption efforts? (select all that apply)
 - In-person community meetings
 - Virtual community meetings
 - In-person small group meetings
 - Virtual small group meetings
 - Social media, e-newsletter, or email
 - Print media (i.e., reports, quarterly updates)
 - SoCal Gas website
 - None, I don't want updates
 - Other (please specify)
- Please provide any additional comments or feedback for SoCalGas that you think are relevant or will be important for the success of this initiative.
